- **CMS and E-commerce:** WordPress, WooCommerce, Custom Plugin Development, Custom Post Types, WordPress Hooks and Filters, WordPress REST API
- **Frontend:** React.js, Vite, Tailwind CSS, jQuery, Responsive Web Design
- **Backend and Databases:** MySQL, Supabase, REST API Integration, Authentication, RBAC
- **Practices:** Performance Optimization, Security Best Practices, Debugging, Plugin Compatibility, Version Control
- **Tools:** Git, GitHub, GitLab, VS Code, phpMyAdmin, Netlify
- **AI-Assisted Development:** Claude, ChatGPT, Gemini, Cursor, Antigravity

PROFESSIONAL EXPERIENCE

WordPress Plugin Developer | Acodez IT Solutions | January 2023 – Present

- Develop and maintain 3 commercial WooCommerce plugins covering checkout field customization, email customization, and PDF invoices and packing slips.
- Build scalable plugin features using WordPress Hooks, Filters, Custom Post Types, and the REST API, with a focus on performance, security, and compatibility with WordPress and WooCommerce updates.
- Standardize plugin code against WooCommerce Marketplace guidelines and ship regular releases with new features, enhancements, and bug fixes.
- Resolve user issues through the WordPress support forum, debugging conflicts with themes and third-party plugins.
- Customize plugins for client-specific needs and collaborate with cross-functional teams to turn requirements into production-ready WordPress and WooCommerce solutions.

PROJECTS

Food Safety Management System (FSMS) | React 19, Vite, Tailwind CSS v4, Supabase | 2026 – Present | GitHub

- Building a centralized web application to replace manual, Excel-based food safety records.
- Implemented authentication, role-based access control (RBAC), employee and department management, and checklist management with a Supabase backend.
- Developing inspection workflows for Critical Control Point (CCP) monitoring, Corrective and Preventive Actions (CAPA), and compliance reporting.

Order Kanban Board – WooCommerce Plugin | React, WordPress REST API, PHP | 2026 | GitHub

- Built a WooCommerce plugin with a React drag-and-drop order board, a custom REST API, optimistic updates with undo, and conflict detection for multi-user editing.
- Added custom order statuses, search, auto-refresh, an accessible order quick-view panel, and full HPOS compatibility.

DevTools Hub – Developer Utilities Platform | HTML5, CSS3, JavaScript, Vite, Netlify | 2026 | GitHub

- Developed a responsive platform of free developer utilities, including a JSON Formatter, Color Converter, Base64 Encoder/Decoder, and code snippet library.
- Built a WordPress WP_Query Generator that produces ready-to-use PHP query code from user-selected options.
- Implemented global search with a Ctrl + K shortcut for fast navigation; deployed on Netlify with Git and GitHub version control.

EDUCATION

Bachelor of Technology (B.Tech) | Institute of Engineering and Technology, University of Calicut | June 2018 – August 2022

LANGUAGES

English, Hindi, Malayalam
